## Projects

### 1. Blood Aid (Blood Donation App)                    Live | Github Client | Github Server

MERN stack web app to connect donors, volunteers, and admins for efficient blood donation management.
Simplifies donor–recipient matching and donation tracking.
Key Features:

- Role-based dashboards (Admin, Donor, Volunteer)
- User management with status/role control
- Data tables with search & filters

**Tech Stack:** MongoDB | Express.js | React | Node.js | TailwindCSS

### 2. Freelance Task Marketplace                    Live | Github Client | Github Server

A platform where users can post freelance tasks, manage bids, and hire efficiently.
Connects task posters and freelancers with transparent bidding.
Key Features:
Task posting, updating, and deletion (CRUD)
Bidding system with live bid counter
Role-based authentication & protected routes
**Tech Stack:** MongoDB | Express.js | React | Node.js | Firebase | TailwindCSS
